

*Does your print shop lack space
Then what you need is our Junior*

Junior

Energy efficient, for a better environment

Your partner for drying solutions

Junior

The Calmatech Junior is a compact tunnel dryer specially designed for the cure of digital textile inks on several materials.

The specially developed airflow plate in this dryer ensures even heating over the whole drying area.

The Calmatech Junior is easy to operate as it is equipped with a touchscreen which enables you to set the temperature, fan speed and belt speed.

Due to optimal isolation this tunnel dryer doesn't waste energy. Also, the specially integrated metal filter guarantees little maintenance. Besides that, the tunnel is easily accessible for cleaning because of the lifting hood which is equipped with gas springs.

Provided with CE Mark.

Junior *Technical specifications*

Dimensions	240x115x120 cm
Weight	470 kg
Heated Length	150 cm
